

Mayor Ann Ferguson OAM

Road safety is paramount and Mount Barker District Council continues to advocate on behalf of the community with State and Federal Government to ensure robust upgrades, informed by well-considered traffic studies, reflect the

needs of our growing community.

Council has recently partnered with the Regional Development Authority (Adelaide Hills, Fleurieu and Kangaroo Island) in the preparation of two significant reports setting out key transport recommendations to improve human and freight transport for the region (reports are titled “People Transport Solutions for the Adelaide Hills” and “Freight Transport Solutions for the Adelaide Hills”).

Mount Barker District Council also commenced work on an update to its Transport Masterplan to inform the future direction of transport related matters to ensure effective, sustainable and efficient transport networks are established.
